

**REMARKS**

Claims 1-10 are all the claims pending in the application. New claims 11 and 12 have been added.

***Drawing***

The Examiner asserts that the subject matter of the application necessitates an illustration by a drawing in order to facilitate understanding of the invention. The Examiner requires a drawing to be furnished under 37 C.F.R. § 1.81, but warns that no new matter may be introduced in the drawing. The Examiner refers to Fig. 8 of the priority document and the corresponding description starting on page 59 of that document, implicitly suggesting that such figure would satisfy the Examiner's requirements.

A single figure is provided herewith, based on Fig. 8, and appropriate modification has been made to the specification so that appropriate reference number may be included in the text. No new matter has been added, as such illustration is readily derived from the original disclosure by one skilled in the art.

***Abstract***

The Examiner objects to the Abstract because of its length and use of legal phraseology. An appropriate Abstract is being submitted to the Examiner.

***Title***

The Examiner objects to the title because it is not descriptive of the invention. An appropriately descriptive title has been added.

***Specification***

The specification has been objected to as containing informalities. The specification has been reviewed and amended to correct idiomatic English. A redlined version of the original specification, showing deletions and additions is submitted herewith which is in compliance

AMENDMENT UNDER 37 C.F.R. § 1.111  
USSN: 09/890,893

with the Examiner's requirement. As requested by the Examiner a substitute specification is filed herewith. No new matter has been added to the substitute specification.

***Claim Objections***

The Examiner objects to claim 3 because of a mistyping of the word "wherein". This has been remedied by this amendment.

***Claim Rejections - 35-U.S.C. § 112***

Claims 1-10 are rejected under 35 U.S.C. § 112, second paragraph as being indefinite. The Examiner identifies in claim 1 and claims 9-10 certain phrases which should be corrected in order to clearly state the invention. Applicant is grateful to the Examiner for his guidance in his comments and an appropriate change to the claim have been made.

***Allowable subject matter***

The Examiner indicates that claims 1-10 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. § 112. On the basis of the claim amendments that have been made, this application should be in condition for allowance.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.
